Address: Khushal colony street 10 Multan, Pakistan

SUMMARY

Full Stack Developer with three years of experience in developing scalable web applications and services. Proficient in MERN and MEAN stacks, with strong expertise in Angular and React. Adept at collaborating with cross-functional teams to deliver high-quality software products using Agile methodologies.

PROFESSIONAL EXPERIENCE

BurjSoft. - Full Stack Developer (3 years)

March 2021 - Present

- Developed and implemented a streamlined process for gathering business requirements, reducing project delivery time by 15%.
 - Created a standardized reporting framework, improving visibility of key performance metrics, increasing performance by 30%.
 - Worked on Full Stack applications and MERN/MEAN projects, and linked frameworks like Capacitor with React and Vue, RxJs with Angular, and Redux with React, achieving 100% project completion.
 - Participated in code reviews, sprint planning, and retrospective meetings using Agile methodologies.
-

PROJECTS

Intelli Warmth ERP software

React, Redux

Expanded an admin dashboard for Intelli Warmth, an ERP system designed for employee management, using React, Redux, and Material-UI. The dashboard facilitates viewing employee data, managing salaries, shifts, and timings, and processing leave requests.

- **Responsibilities:**
 - Created the admin dashboard for Intelli Warmth, an ERP software for employee management.
 - Enforced functionalities to view and manage employee data, including salaries, shifts, and timings, as well as processing leave requests.
 - Ensured seamless data synchronization between the admin dashboard and the employee mobile app.

Technologies Used:

- React, Redux, Material-UI, JavaScript, HTML5, CSS3, React Router

Contributed to the development and enhancement of ChurchillLiving, a comprehensive platform using the Angular framework. The project consists of three repositories: front-end, Admin, and Toolkit.

Admin Repository:**• Responsibilities:**

- Designed and applied administrative functionalities and pages using Angular.
- Implemented user authentication and authorization mechanisms for secure access control.
- Integrated data visualization tools to provide insights into platform usage and performance.
- Improved CRUD operations for managing user data and system configurations.
- Provided feedback to maintain codebase consistency and quality.

Toolkit Repository (@churchilLiving NPM Library):**• Responsibilities:**

- Developed a reusable library of Angular components and utilities for consistent UI across projects.
- Created custom directives and services to enhance efficiency and code maintainability.
- Documented usage guidelines and best practices for seamless integration by front-end developers.
- Managed versioning and dependencies to ensure compatibility and stability across projects.
- Contributed to the open-source community by sharing components and accepting contributions.

Technologies Used:

- Angular, TypeScript, HTML5, CSS3, RxJS, NPM, Git
-

EDUCATION

BSCS NFC IET Multan

- Grade: A
- CGPA: 3.2
- Graduation Date: February 2022

Pre-Engineering - Britain International College

- Grade: A

Matriculation in Science - Icon Public School

- Grade: A
-

SKILLS

• Proficient in:

- MERN/MEAN Stack: MongoDB, Express.js, React.js, Angular, Vue, Node.js
- Front-end Technologies: HTML5, CSS3, TypeScript, JavaScript, RxJS, Material-UI, PrimeNG
- Back-end Technologies: Node.js, MySQL

• Experienced in:

- Version Control: Git

• Knowledgeable in:

- Vue, Microservices Architecture, Agile Methodologies, Scrum Framework, AWS, Firebase
